Hospital

Dr. Muhammad Dogar is a board-certified interventional cardiologist serving patients in NEPA. He brings extensive training from SUNY Stony Brook and SUNY Downstate Medical Center, along with more than a decade of clinical experience in internal medicine, cardiology, and advanced interventional procedures. His background includes high-volume coronary work, heart failure research, and leadership roles in cardiac and pulmonary rehabilitation programs. Dr. Dogar is experienced in a full spectrum of interventional cardiology procedures. Dedicated to providing timely, evidence-based, and compassionate cardiovascular care, Dr. Dogar combines strong clinical judgment with advanced procedural expertise. His active licenses in Pennsylvania and New York, along with multiple ABIM board certifications and echocardiography credentials, reflect his commitment to excellence and continual advancement in the field of interventional cardiology.
