- Resident in General Surgery, Hospital of the Medical College of Pennsylvania, Philadelphia, PA
- Intern in Internal Medicine, Albert Einstein Medical Center, Philadelphia, PA

As a urologist, Dr. Goldstein specializes in diagnosing and treating diseases of the urinary system, which includes the bladder, kidneys, ureters and urethra. He also treats conditions involving the reproductive organs and the adrenal glands. Dr. Goldstein is a longtime colleague of Dr. Donald L. Preate, Jr., who oversees Wayne Memorial's Urology Department. They share a similar patient-care philosophy, treating every patient as an individual.
